**COURSE OVERVIEW**

**COURSE DESCRIPTION**

***This Security Planning & Operations training course will provide participants with an insight into the fundamentals of managing Modern and Effective Security Operations. This training course will address a wide variety of topics such as security policies and procedures, risk management, access management and investigation, to enable all participants to understand the principles of security and risk management.***

***Management of security risks applies the principles of risk management to the management of security threats. It consists of identifying threats (or risk causes), assessing the effectiveness of existing controls to face those threats, determining the risks' consequence(s), prioritising the risks by rating the likelihood and impact, classifying the type of risk and selecting an appropriate risk option or risk response.***

***This Security Planning & Operations training course will provide practical and up-to-date security management skills and techniques that can be implemented within each participant's organisation and security team. Through daily classroom simulations, test your ability to work under pressure in crisis situations and respond to common problems you may face in your daily operations.***

***A Security Operations Manager must have an oversight of the multiple activities performed in day-to-day operations, while keeping on top of continuous regulatory development. This Effective Modern Security Management and Operations training course validates your ability***

*to manage your team, suppliers, resources, and business processes in line with current industry standards. You will learn all the necessary security measures in response to dynamic security demands.*

*This training course will feature:*

- *Developing your ability to respond to security situations*
- *Interpreting the latest international regulatory requirements*
- *Improving professionalism in your facility by developing and implementing effective solutions*
- *Identifying and managing security risks*
- *Preparing Risk Matrixes and determining consequences of events*

**COURSE OBJECTIVES:**

*At the end of this program, participants will be able to:*

- *Apply basic concept of management to security and explain the specialist role of the security manager*
- *Plan, develop and organise the human and material resources necessary for the effective operation of a security unit*
- *Advise on the development of security programs and Standard Operating Procedures*
- *Monitor and enforce the implementation of security programs and SOPs*
- *Verify that security personnel are able to implement security preventive measures*
- *Advise on the development of emergency plans and manage the security response action necessary in security emergencies involving facilities, terminal buildings and public access facilities.*

**SUITABLE FOR:**

*This Security Planning & Operations training course is suitable to a wide range of professionals but will greatly benefit:*

- *Experienced / Non-Experienced Security Managers*
- *Civilian Representatives*
- *Managers*
- *Supervisors*
- *Risk Management Staff*

*The course is also designed for other professionals who need to keep up to date with the latest trends in security management techniques.*

**TRAINING METHODOLOGY:**

*A highly interactive combination of lectures and discussion sessions will be managed to maximize the amount and quality of information and knowledge transfer. The sessions will start by raising the most relevant questions, and motivate everybody find the right answers. You will also be encouraged to raise your own questions and to share in the development of*

*the right answers using your own analysis and experiences. Tests of multiple-choice type will be made available on daily basis to examine the effectiveness of delivering the course. Very useful Course Materials will be given.*
